## **Works in the Dark**

In 2013/14, Under-secretary of State,  
Victoria Nuland sowed discord among the  
people in Ukraine. In 2014, Under-  
secretary of State, Victoria Nuland was not  
concerned about the support of the EU -  
she made her disposition clear. She said to  
forget about the EU - However, she did not  
say it like that - it is not appropriate for me  
to speak the profane word that she said.  
The President of Ukraine was forced out of  
office when some people rebelled against  
the President. It is reported in November  
2013, Nuland made known her support for  
the rebels and it is said that she brought  
them cookies. Moreover, in 2014, she was  
working with the rebels to help determine  
who would be the interim President of  
Ukraine before the duly elected President  
fled to Russia. Consequently, the United  
States of America supported the rebels  
who overthrew the government, and the  
duly elected President of Ukraine was  
forced to flee the country. Under-secretary  
of State Victoria Nuland sowed discord  
among the people in Ukraine; GOD sees  
this action as an abomination. Surely, in  
2014 there was a civil war in Ukraine. There  
were some who supported the alignment  
with Russia, and some opposed this  
alignment. The United States supported  
the ones who overthrew the government  
and were opposed to the alignment with  
Russia.
